

The ICS-ISAC is a non-profit private sector organization with a mission "To provide an efficient exchange of Industrial Control System security Information and Knowledge among impacted parties on behalf of the Private Sector."

# ICS-ISAC 2014 FALL CONFERENCE SPONSORSHIP GUIDE

**The 2014 ICS-ISAC Fall Conference is a forum for building knowledge among the industrial control system community. Hosted at Georgia Tech Research Institute, attendees and sponsors will represent US and international leaders in industrial cybersecurity.**

**SEPT 17-20, 2014 • GEORGIA TECH RESEARCH INSTITUTE, ATLANTA**

**Sponsors of the conference will demonstrate their commitment to the community and have the opportunity to communicate the value they bring to securing infrastructure.**

## Overview

With the market for solutions rapidly expanding, commercial and industry organizations have a unique opportunity to present their solutions to representatives of key demographics across critical infrastructure.

In a first of its kind event, the ICS ISAC is bringing together leading subject matter experts from around the globe to provide solution-oriented keynotes, panels and training sessions on the topic of cyberphysical security. Asset owners, vendors, integrators and policy makers will have the opportunity to gain knowledge that can be directly applied to their roles in securing cyberphysical systems.
